

WOScan for Work Order

Minimize User Entry and Maximize Workflow

WOScan for Work Order is a highly flexible, adaptable wireless data collection solution, ideal for manufacturers using the Sage 100 Work Order Module.

Accuracy & Efficiency

- Real-Time Data Validation
- Works Connected or Offline
- Eliminates Manual Entry Tasks
- Validate Against Sage 100 Database

WOScan Shop Floor Data Collection

WOScan for Work Order is a wireless handheld or desktop solution that allows you to efficiently and accurately collect and process work order transaction data on the shop floor using handheld devices.

WOScan validates and communicates data in real time to the Work Order module within Sage, delivering immediate access to accurate, timely information you can use to make better decisions.

Eliminate redundant data entry and costly time delays. Capture your Work Order transaction data on the shop floor in real-time, in a clean, intuitive interface.
