

Scanco UDI Enhancement

FDA Medical Device Data Collection

Scanco's UDI enhancement integrates with Sage 100 for more streamlined regulatory compliance with the FDA. Simplifies the data collection and tracking of additional GS1 and HIBCC fields mandated by the FDA for the medical device industry. Scanco Warehouse's UDI enhancement allows you to create, print, and store your own complex barcode labels and templates in an easy-to-use interface.

Transactions

- Purchase Orders
- Invoice Data Entry
